APPLICATION/FITTING INSTRUCTIONS

The application instructions/fitting guidelines for this orthotic product are for the use of certified, qualified orthopaedic professionals only. Patients are not to attempt to apply or adjust any device unless expressly instructed to do so by the orthopaedic professional responsible for prescription and/or initial fitting of the device. All questions should be referred to the orthopaedic professional and not to the manufacturer. The manufacturer warrants only that the enclosed device has been inspected for quality and can be effective for certain indications, but the final decisions and ongoing monitoring must be made by the orthopaedic professional(s) prescribing and/or fitting the device to determine its effectiveness for an individual patient. Patient compliance is an integral part of the entire treatment protocol and must be adhered to avoid potential problems and maximize the effectiveness of the prescribed device.

FOR SINGLE PATIENT USE ONLY

As a condition of sale of any orthotic product, each device is restricted to the patient for which it was prescribed and cannot be reused. This requirement protects the care provider and the patient against potentially adverse consequences such as infectious disease transmission, material instability and/or decrease in therapeutic benefit. Any express or implied warranties are thereby voided with any attempt to reuse the device. Additionally, any right to use license under any relevant patents pertaining to the device is terminated with the cessation of use by the original patient. As with all orthotic products, this device must be prescribed and applied by a qualified orthopaedic professional to ensure it meets the needs of the patient(s) and accomplishes the desired results.
